GRUNT

GIT

REST

SVG

SUBLIME

I've used in the past, but have lots left to learn:

NODE.JS

PHOTOSHOP

DJANGO

ILLUSTRATOR

PHP

.NET

SHELL

ANGULAR

BACKBONE

BALSAMIQ

Interests

Cycling

Gaming

Painting

Music

Beer

Maple Leafs

Coffee

Star Wars

Blue Jays

Education

Interactive Multimedia at Sheridan College
Post-Graduate Degree 2010 - 2011

Visual and Creative Arts at Sheridan College
Advanced Diploma 2007 - 2010

Experience

Front-End Developer at Condo Culture

November 2016 - Present

- > Responsible for building all aspects of the Condo Culture Web App
- > The Web App included a handful of static web pages as well as a full featured search page for users to search for condos to rent and buy
- > The Web App was built on a Node.js Express backend using the Kraken.js framework
- > The front-end was built with React JS as a framework using the latest ES6 methodologies. The styling was all done in SCSS
- > A grunt task runner ran various processes like ESLint, Stylelint, Browserify, Uglify, Babel, PostCSS etc. in order to make development and production builds

Lead Front-End Developer at Union Creative

April 2016 - November 2016

- > Continued all responsibilities of a Front-End Developer, building and maintaining the front-end of websites and apps based in various backend languages
- > Worked on innovative side projects using prototyping technologies like Raspberry Pi and Arduino
- > Worked with Project Manager to delegate work to the appropriate Front-End and Back-End team members
- > Worked with Project Manager and Lead Back-End Developer to restructure the best JIRA Agile workflow that would work for our processes
- > Worked with Creative, UX and Strategy teams to come up with the best solution we could offer a client
- > Led the rebuild and maintenance of the company's Wiki in order to keep current and legacy projects well documented
- > Led improvement of other internal practices and processes such as documentation by developers and composition building by designers

Front-End Developer at Union Creative

July 2013 - April 2016

- > Create look and feel of websites based on compositions provided by a creative team
- > Specialize in HTML5, CSS and Javascript languages
- > Familiar with backends based in Django(Python), PHP and .NET
- > Use Javascript prototype object enclosures on all projects
- > Use version control systems such as git for all projects
- > Use Frontend Frameworks to organize app structures when needed
- > Use other common front-end plugins and tools such as Grunt, LESS, Javascript Templates, Underscore.js, JQuery, Modernizr etc
- > All projects are designed and developed with responsive styles, functionality and performance in mind

Junior Flash Developer at EdCetra Training

December 2011 - July 2013

- > Responsible for designing User Interfaces of major eLearning courses
- > Responsible for designing detailed mock ups of how an eLearning course would operate
- > Designed and developed pictures and flash assets for eLearning courses
- > Translated flash based courses to HTML/CSS/JS
- > Developed mobile reading eLearning modules gaining extensive experience with HTML, CSS and JS
- > Translated static sized websites and courses into responsive design in order to work on tablets and smartphones
- > Responsible for managing up to five projects at a time
